

Drone Team Resources

- Drones
- RID2Caltopo
- Eagle Eyes Pilot
- Eagle Eyes Scan

Drones:

- Large Open Props
 - Require large area to launch/retrieve
 - Can't fly near people or objects.
 - 40+ minute battery life
 - Infrared (Thermal) camera
 - Zoom camera
 - Above the canopy.
 - Deploy from vehicle for extended flight times.
- Small Open Props
 - Man portable - usually in searchers backpacks
 - Can't fly near people or objects.
 - Extend coverage/safety of ground team over steep faces.
 - Above the canopy.
 - Some have 40+ minute battery life.
 - No Zoom and no infrared.
- Small Ducted
 - Man portable - can be in backpack
 - Can fly near people and objects.
 - Extend coverage/safety of ground team over steep faces.
 - Excellent for under canopy - requires good pilot.
 - Less than 20 minute battery life.
 - No zoom, no infrared.

RID2Caltopo

- Android app and Dronescout Bridge
- Real-time drone track updates into Caltopo (requires network).
- Local track archive for after the fact upload to Caltopo
- Supports limited anomaly detection

Eagle Eyes Pilot

- Only available on Matrice 4TD - real time anomaly detection

Eagle Eyes Scan

- Only available on Ken's Laptop - run against captured videos or photomosaics
